

## Help Falls Church Become a Green Power Community!

The City of Falls Church Council has launched a year-long, City-wide challenge to become a US Environmental Protection Agency (EPA) Green Power Community. City residents and businesses are encouraged to work collectively to purchase and/or generate renewable energy in amounts that meet or exceed 3% of the total community-wide electricity use.

Materials about the program are available in the library (on the glass “giveaway” shelves on the main floor).

Additionally, representatives from Green Power will visit the library several times in the next month to answer questions:
